

# Group 6: Intro to Cloud Computing

Steven Wetten

HaoLun Zhang

Abigail Clemens

James Park

We will be designing a Shopping Bot that can search websites for products that match the user's parameters, like item, price range, characteristics, as well as compare products between different sites. We will utilize a web user interface that communicates with the user and a worker. The worker's main function will be to be the intermediary between a database and a web crawler. The web crawler, will search certain websites for these parameters, and we plan to build off of a template we can find online. After, the worker will put these results into a database, which it will then access after all the searching is complete to compile and display user-friendly results on the web UI.

---

## Education

- Delaware County Community College Associate Degree in Computer Science; GPA: 3.39

Media, PA

January. 2020 – August. 2021

- West Chester University

Bachelor Degree of Computer Science ; GPA: 3.44 West Chester, PA

September. 2022 – May. 2024

---

## Experience

- Equuleus International Club Office Assistant June 2021 - August 2021

- Microsoft Excel: Demonstrated expertise in utilizing Excel to effectively sort, filter, and manipulate large amounts of data.  
Extensive experience in using Excel for data cleansing, data validation, and data visualization tasks. Skilled in using Excel for data management, organization, and analysis of extensive datasets.
- Microsoft Word: Proven track record of efficiently managing and organizing large documents using Word's navigation and referencing tools.  
Strong ability to create and format tables, charts, and graphics in Word to enhance document presentation.

- Alpha Computer Front Desk Assistant Malvern, PA May 2015 - October 2015

- : Meet and assist incoming customers promptly.
  - : Set up, test, and configure networks, desktops, laptops, and printers.
  - : Assisted in basic administrative tasks, including document filing and record keeping. concerns and issues professionally and efficiently.
- 

## Projects

◦ Database Management Project: Utilized Microsoft Access to design and develop a database, including creating tables, establishing relationships, writing queries, and generating reports, to support internal data management and information tracking within the organization.

◦ Market Trends Analysis in the Used Car Sector: Performed a thorough examination of the used car market through Python, utilizing the programming language for data manipulation, cleaning, and exploratory data

---

analysis tasks. Employed data visualization libraries to generate informative charts and graphs, effectively illustrating market trends within a designated date range. Additionally, I created visualized the distribution of used car sales.

### Programming Skills

\* Languages: Java, Python, SQL, Microsoft Office

---

### Language Skills

◦ Fluent in Chinese

## Goal

---

A job that will allow me to grow and expand my knowledge of modern software development practices.

## Software Skills

---

- ❖ Proficiency in **Java**
  - Developed a **lexical and syntax analyzer** that analyzed a simple language.
  - Developed a simple computer game that had a goal of jumping over as many moving blocks as possible and recorded a high score.
  - Used run time and compile time polymorphism to enhance functionality of various computer programs.
- ❖ Proficiency in **Swift**
  - Developed a simple computer game that had a goal of collecting coins and avoiding bombs that was based on a game called *Richman 4*.
  - Used unique properties of **Xcode** to develop simple games that incorporated physics and scoring systems.
- ❖ Working knowledge in **Python**, **OCaml**, and **Git**
- ❖ Proficiency in **Windows** and **Mac OS** with working knowledge in **Linux**
- ❖ Proficiency in **Word**, **Excel**, and **PowerPoint**

## Education

---

*West Chester University — West Chester, PA*

**Bachelor of Science in Computer Science**

Mathematics Minor

May 2024

GPA: 3.79/4.0

Computer Science Courses

- ❖ Topics in Complex Systems (iOS App Development)
- ❖ Database Management Systems
- ❖ Digital Image Processing

❖ Data Structures and Algorithms

**Activities:**

❖ West Chester University Esports Club

- President from August 2022 to present
- Organized an esports tournament series in King of Prussia from March 2023 to June 2023

---

**Other Experience**

---

Wegmans — Concordville, PA

**Cashier**, October 2019 to March 2020, June 2021 to Present

- ❖ Provided excellent customer service by being friendly to customers and helping them locate desired items.
- ❖ Achieved a high IPM (items per minute) of 18 in order to assist customers quickly.
- ❖ Received training in other areas to learn more and help benefit the company.
- ❖ Learned to work in the deli.

## Education

---

### **B.S. in Computer Science & Computer Security Certificate**

West Chester University of Pennsylvania, West Chester, PA Cumulative GPA – 3.68

Relevant Coursework:

- CSC 141 – Computer Science I
- CSC 142 – Computer Science II
- CSC 231 – Computer Systems
- CSC 240 – Computer Science III
- CSC 241 – Data Structures & Algorithms
- CSC 345 – Programming Language Concepts / Paradigms
- CSC 402 – Software Engineering
- CSC 416 – Design / Construction of Compilers
- CSC 472 – Software Security

## Experience

**Programming Competition Student Judge** West Chester University, West Chester, PA March 2023 – November 2023

2020 – Present

- Collaborated with a team of peers to write several programming problems for three separate programming competitions
- Displayed leadership throughout the development of problems of differing difficulty through coordination and delegation of work

**Programming Competition Club Secretary** August 2023 – Present West Chester University, West Chester, PA August 2023 – Present

- Led meetings studying recent coding competitions and various programming concepts
- Assisted peers and newer students with their programming issues and questions

## Skills

- Java
- Object-Oriented Programming
- Data Structures & Algorithms

- Software Engineering
- Functional Programming
- Compilers
- Haskell
- Python
- C
- Linux
- Eclipse
- Github

---

I am a product-driven individual with a wide array of professional experiences looking for a full-time position or internship that will lead to gainful employment for my last year at school. AI, Machine Learning, and Natural Language Processing are some of the areas that I would like to learn more about and work in, and I have experience in general troubleshooting for Windows and Macs, Object-Oriented Programming languages, Assembly language, Networking, and more. I am open to working in almost any industry but find work in international or political issues, food, and finance the most interesting.

---

## Education

**West Chester University of Pennsylvania** West Chester, PA; *Jan 2023-Current*

-Pursuing Computer Science B.Sc. and Linguistics Minor | Expected graduation in June 2025 | Current GPA: 3.72  
-Participant in: WCU Sept 2023 Programming Competition | CSTA Hackathon Sept 2023- 1st Place | WCU March 2023 Programming Competition- 3rd Place | March 2023 Python Bootcamp | April 2023 West Chester Programming Competition

**George Washington University** Washington, DC; *August 2008-July 2012* -International Affairs B.A. | Chinese Language and Literature B.A.

---

## Additional Skills

-Java, C, Python, HTML/CSS, SQL  
-Multilingual in Mandarin, Korean, and Nepali  
-Excellent Public Speaker

## Relevant Coursework

I have taken courses on Discrete Math, Automata, Calculus, Statistic, Java, SSH, and other network protocols, along with general education requirements necessary for my degree completion at WCU. These include Chemistry, Geology, & Business Writing.

---

## Work Experience

**Infinitus;** Remote; *Dec 2023 – Jan 2023*

AI Operations Intern

-Developed an understanding of the healthcare insurance landscape, especially issues surrounding payments - Operated the AI interface at the customer-interaction stage to ensure smooth and useful conversation -Performed data-entry of patient and insurance information into specific formats for AI improvement

**West Chester University** Tech-Fee Computer Lab Intern West Chester, PA *May 2023 - Present*

-Monitoring the software, hardware and accessories for the over 3,000 Tech-Fee devices on WCU campus - Providing support for the faculty/staff and students, including troubleshooting, upgrading devices, and recycling - Negotiating solutions for issues pertaining to devices, software, and general use of the labs

**West Chester University** Chinese Language Tutor West Chester, PA *Jan 2023 - Present*

-Providing weekly in-person and online tutoring sessions to students enrolled in the Chinese program -Coordinating lesson plans and student progress reports with the faculty to ensure student success

**Community Academy of Philadelphia** Information Technology Intern Philadelphia, PA *June 2022-Jan 2023*

- Assisted in organizing, cleaning, and maintaining inventory of computers for staff and students
- Resolved technology-related issues for faculty and students during school hours
- Organizing spreadsheets to record which devices are with whom

**Dig Acres** Assistant Manager Chester, NY *June 2018-Oct 2021*

- Lead manager in Food Safety and farm adherence to Good Agricultural Practices (GAP) regulations
- Managed and taught crew of 3-5 apprentices for 8-9 month through an intensive agricultural education program -
- Oversaw and organized harvesting, weeding, plowing, and other activities related to day-to-day farm operations -
- Facilitated Dig Supply Team and Corporate offices on various projects and operations
- Frequently held or attended events that promoted the farm and company

**Peace Corps Nepal** Food Security Volunteer Khasyauli, Palpa District *March 2015-June 2017*

- Trained local farmers on growing higher-quality vegetables and increasing seasonal availability, including high-yield intensive methods on small plots of land
- Co-Facilitated week-long agricultural camp for village youths, topics ranged from land-restoration to gender & caste issues
- Established a System of Rice Intensification demonstration with three model farmers, with a 100% increase in production
- Discussed nutrition-related diseases with locals and held cooking & gardening demonstrations with the goal of long-term behavior change
